

# Summer STEM Adventures

Monday-Friday (2-5pm)

\$100 Full Members/ \$120 Non-Members & No Frills Members (per session)  
Ages 6-10

## Far Out Space: June 24-28

Space is FAR OUT... literally! Join us for a weeklong look into our galaxy and the machines we use to study it. Inspired by NASA, this camp is packed with real-life space concepts, as well as Lego model building. Just to add a little fun, we will also blast off into a galaxy far, far away with Star Wars Lego building and activities. It is a week that will have your creativity and imagination ready for take off!

## Destination CREATION: July 22-26

Join us to get your brain and your hands busy with creations of all kinds! Engineering challenges, Lego building, and a slew of concoctions will get your imagination going towards the final destination of... CREATIONS! It is a week that will include innovation, problem solving, and FUN!

## Superhero STEM: August 19-23

Get inspired by your favorite superheroes for this camp that has super-powered challenges and experiments. Learn about flight, invisibility, super strength, magnetism and more as we learn the science behind super powers and also build super-cool models with Lego bricks. Be a STEM Superhero with us this week and learn all of the secrets behind the powers.

**All camps include 2 hours of activities per day led by a trained instructor, snack and playtime in the museum.**

*\*All camps are filled on a first come, first served basis and are subject to cancellation if the minimum number of registered participants is not met.*

*\*Camp payments are non-refundable, but fees may be transferred to other museum programs or purchases.*

Visit our website to register [www.gbchildrensmuseum.org](http://www.gbchildrensmuseum.org) .  
Space is limited.
