March 12, 2020

At The Children’s Museum of Green Bay, the health and well being of our visitors, staff and volunteers are always of utmost importance to us.

Cold and flu season is always a concern for families with young children, and we maintain a rigorous daily cleaning practice year-round. While the risk of Coronavirus (COVID-19) in our region is currently low, we will continue to take all precautions to keep the Museum safe and sanitary for visitors, staff, and volunteers.

Please do your part by applying the following best practices for hygiene and wellness:

• Wash your hands often with soap and water for at least 20 seconds (two rounds of the Happy Birthday song) especially after using the restroom, before eating, and after blowing your nose, coughing or sneezing.

• Between hand washings, please use an alcohol-based hand sanitizer.

• Avoid touching your eyes, nose and mouth or use a tissue to do so, immediately disposing of it in a designated wastebasket after use.

• Please stay home if you are sick or have been around people who are sick, even if you are showing mild or no symptoms.

• We recommend you do not attend the Museum if you or your child is immuno-compromised or if you have an underlying health condition

• We know the news around the Coronavirus feels frightening—for kids and adults. Here are some resources that you might find helpful:
  • How to talk to children about Coronavirus (from NY Times)
  • A comic for kids on the Coronavirus (from NPR)
  • CDC: A video about the importance of proper handwashing

We are monitoring information from the CDC and city, county, and state public health departments. We will continue our regular hours and programs as scheduled until officials or our Board of Directors recommend otherwise. Any changes to our hours or programs will be shared via Facebook.

Be Safe. Be Healthy. Be Playful.
